

My Solar System is Installed, What's Next?

Inspections and Utility Net Metering

- mtvSolar will schedule your electrical and building inspections.
- After inspection, the utility will be notified to switch your electric meter with a Net Meter. This may take up to 4 weeks.
- You must notify mtvSolar when your meter exchange has occurred as the utility will not tell us directly.
- If your utility meter is not replaced within 4 weeks please contact your utility provider's customer service line via the phone number located on your bill.

SREC Registration

mtvSolar will apply on your behalf for SREC registration. Once you are registered you will receive an email from your SREC aggregator, from this point on you will work directly with the SREC Company to manage your account.

SRECTrade Customer Service Phone Number: 1-877-466-4606

System Monitoring

If you have an always-on internet connection your system can report production data for viewing online. You will receive a welcome email regarding the details of your monitoring account from SolarEdge or enPhase.

From time to time there may be an interruption in your internet service, however this will not affect your actual production. Once back online, the Internet portal will catch up over time.

Internet monitoring is not required for system operation. Some clients solely read the production meter to monitor their production.

Tax Credits/Incentives

Please visit www.dsireusa.org for a full list of current Federal and state incentives. mtvSolar will provide you with a statement of your solar purchase that you may use to claim the tax credits. If you have questions regarding applicability of tax credits, please consult your tax professional.

Referral Incentives

mtvSolar offers incentives when you refer family, friends and neighbors! Whether it's a word of mouth referral, or hosting a solar mixer, we would love to reward you for referring mtvSolar! Please contact us to discuss these benefits.
